CPYRGHT

**Broad face of plenty, the rich red earth of western Victoria yields the state's major crop—wheat. The federal government purchases the harvest and markets it. Because of low prices and recent surpluses, farmers planted less wheat last year.**

**New neighbor on the old range:** The coal-burning Hazelwood Power Station rises on pastureland near Morwell, previously owned by Alfred Ronald, who retains grazing rights for his Aberdeen Angus herd. Facing displacement, the nearby town of Yallourn, built

50 years ago as a model mining community, sits on coal deposits needed to fulfill a demand for electricity that doubles every nine years.

CPYRGHT

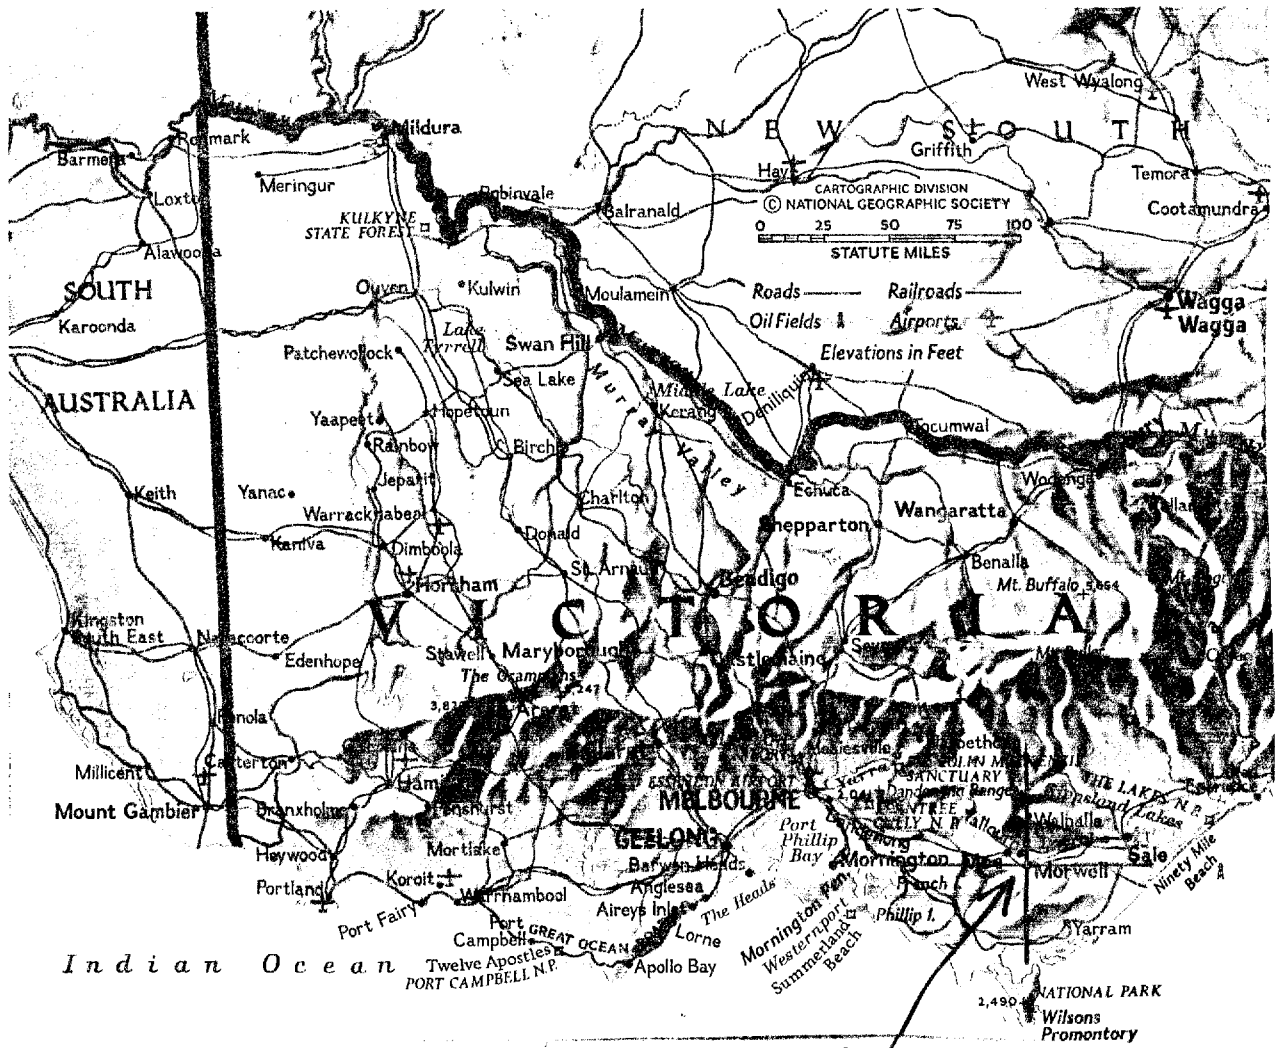

**L**IKE A PLAGUE of Biblical times, hordes of rodents ravage wheat stored in the open near Ouyen. The common house mouse has taken to the bush and multiplies rapidly in periods of high rainfall and large grain surpluses, as in 1917, 1932, and 1947. Last year the mice of Victoria, New South Wales, and South Australia again reached plague proportions. Once normal times returned, cannibalism, disease, and natural enemies again reduced their numbers.
